

Keep our ecology clean

Автор: Калиновский А.,

8а класс

Ecology around me

The problems start here: Air pollution, acid rains, water and soil pollution. It is dangerous for our life . People, help the earth to survive.

Air pollution

Factories, cars, forest fires pollute air and environment. The layer of ozone does not protect the earth from harmful radiation. There are a lot of ozone holes. Our atmosphere is in danger.

Water pollution

When acid rain falls into lakes, rivers, seas they become toxic.

Soil pollution

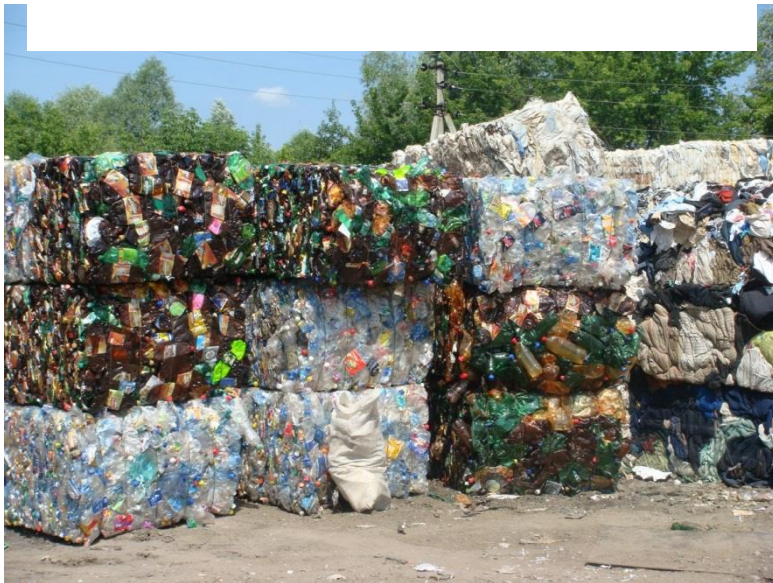

Toxic fumes pollute our planet. Animals, birds leave their nests.

Paper bags and plastic bags

are needed in the recycling centers to save our environment.

A plastic bag takes more than 1000 years to decompose.

Child's wish

I want to live
And not to die
I want to laugh
And not to cry
I want to fly into the blue
I want to swim as fishes do!
